SUMMARY

Frontend web developer with experience working as a freelancer since 2020. During this time, focused on HTML/CSS layouts, creating new websites from scratch, and maintaining existing ones on Wordpress/PHP. Recently, transitioned from PHP to React and have been working on personal projects to develop my skills in this area. Currently seeking new opportunities to grow and further develop my skills as a professional frontend web developer.

WORK EXPERIENCE

Frontend Developer   2020 - 2023

Freelance

- Created over 20 landing sites and 3 online shops, using HTML/CSS and WordPress/PHP platforms.
- Developed more than 75 pages, ensuring responsiveness and usability across all devices and browsers.
- Provided ongoing maintenance and support for existing websites, ensuring that they remained up-to-date and functional.

In 2022 transitioned from PHP to React and worked on personal projects to develop skills as a frontend web developer.

PROJECTS

Paint Online

Paint Online is a web application that allows you to draw with other people in real time with WebSocket connection!
On **Frontend**: React, TypeScript, MobX and ChakraUI.
On **Backend**: ExpressJS with Express-WS.

KirillGoryakin/Paint-Online

Chat Up

This is a simple live chat application with authorization via email or Google. It uses Firebase as backend.
On **Frontend**: React, TypeScript, Redux and ChakraUI.
On **Backend**: Firebase, Firestore Database.
